The Burpee Buildings, pictured below, are especially equipped to properly and quickly fill your orders, most of which are shipped the same day they are received. If you have not depended upon Burpee for your annual supply of seeds, do so this year; a trial order will be appreciated. It is our purpose to serve you so well, and at so low a cost, that you will never again handle any other seeds except Burpee's.

Special Advertising Offer

In our retail advertisements, we are making a Special Offer of 4 Pkts. Giant Dahlia-Flowered Zinnias—4 Best Colors—1 each of Scarlet, Yellow, Lavender and Rose for only 10c.

New Marigold for 1939 Burpee's Red and Gold Hybrids

**The only large Red Marigold in existence
Hybrids between African and French Marigolds**

The flowers of Burpee's Red and Gold Hybrids grow 2½ to 3 in. across. Some are solid red with a brilliance never before seen in Marigolds; others are delightful combinations of red and gold. The flowers vary in color according to season and even in different flowers on the same plant at the same time. At times they are almost pure golden-yellow and at other times bright rich mahogany-scarlet. In vividness and richness, the coloring is unsurpassed.

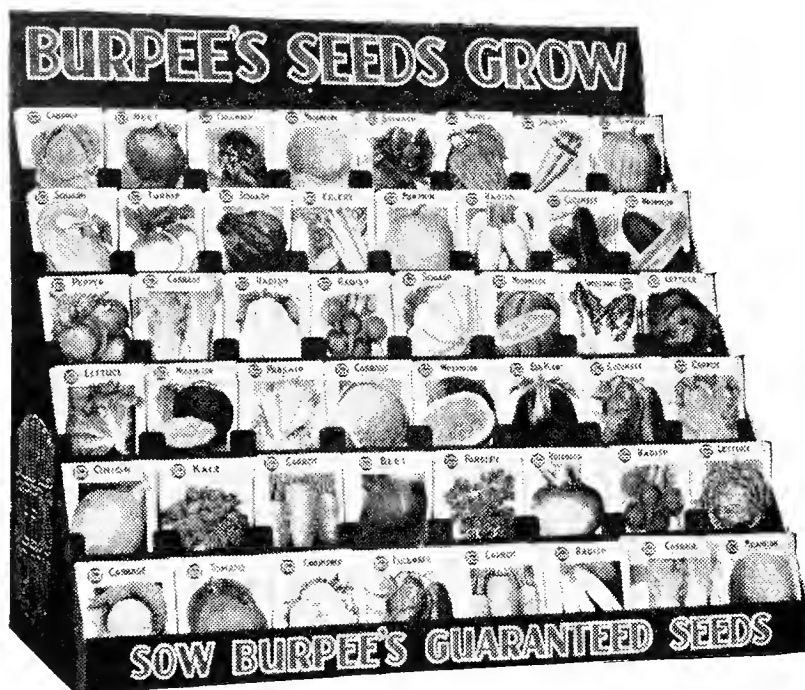

Burpee's Red and Gold Hybrids are the liveliest colored and most outstanding of all Marigolds. They are extremely double and three times the size of the largest double French Marigold. The petals are of such great substance that the flowers will remain in good condition on the plants for two to three weeks and equally as long in water when cut.

Red and Gold Hybrid Marigolds are amazing in many ways. They are the earliest of all Marigolds as they come into bloom in less than eight weeks from seed. The plants are more profuse blooming and will continue to flower over a longer period of time than any other Marigold, in fact, they have flowered continuously for more than six months in the open garden. Plants grow 1½ ft. tall, 2 ft. wide, and are literally covered with flowers at all times.

Burpee's Red and Gold Marigolds are hybrids between the African and French Marigolds and for this reason a few African Marigolds of an orange color will appear in any planting. These African Marigolds can be distinguished from the hybrids before the plants are ½ in. high by the green color of their stems, whereas the hybrids have deep red stems. In this way, it is easy to separate the hybrids from the African Marigolds before setting them out.

Burpee's Red and Gold Hybrid Marigolds are the most sensational new flowers for 1939. Nothing like them has ever been seen before. Sold in sealed packets only; showing the flowers in actual color. Will find ready sale. Order your supply today.

**Packets (60 seeds) to retail at 25c each: \$1.75 per dozen; 25 pkts. \$3.50;
50 pkts. \$6.50; 100 pkts. or more @ 12½c each.**

Burpee's Early Flowering Sweet Peas

Varieties are arranged in each color class from deep to light shades

Burpee's Early Flowering Sweet Peas come into bloom 3 to 4 weeks earlier than the Summer Flowering varieties offered on pages 31 to 35. They are especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North, and also valuable for winter flowering under glass. They are being planted more and more every year.

If you live in a locality where late Sweet Peas do not grow well, have your customers try Early Flowering. They will bloom before the summer heat arrives. Sweet Peas do best in cool weather so seed should be sown as early in the spring as the ground can be prepared. They prefer an open, sunny location, and deep rich soil which must be well drained.

Burpee's Sweet Peas are famous the world over as the "Best That Grow." The flowers are extra large, of perfect form and texture, well placed on long, strong stems, and usually produced in sprays of four.

1/2 lb. or more of any named Sweet Pea listed may be ordered at the lb. rate.

At Burpee's Floradale Seed Farms, our plant breeders carefully select the best individual plants to furnish seed for the next year's sowing. Such plants are "caged" to prevent being mixed by bees.

Burpee's Experimental Grounds and Seed Farms

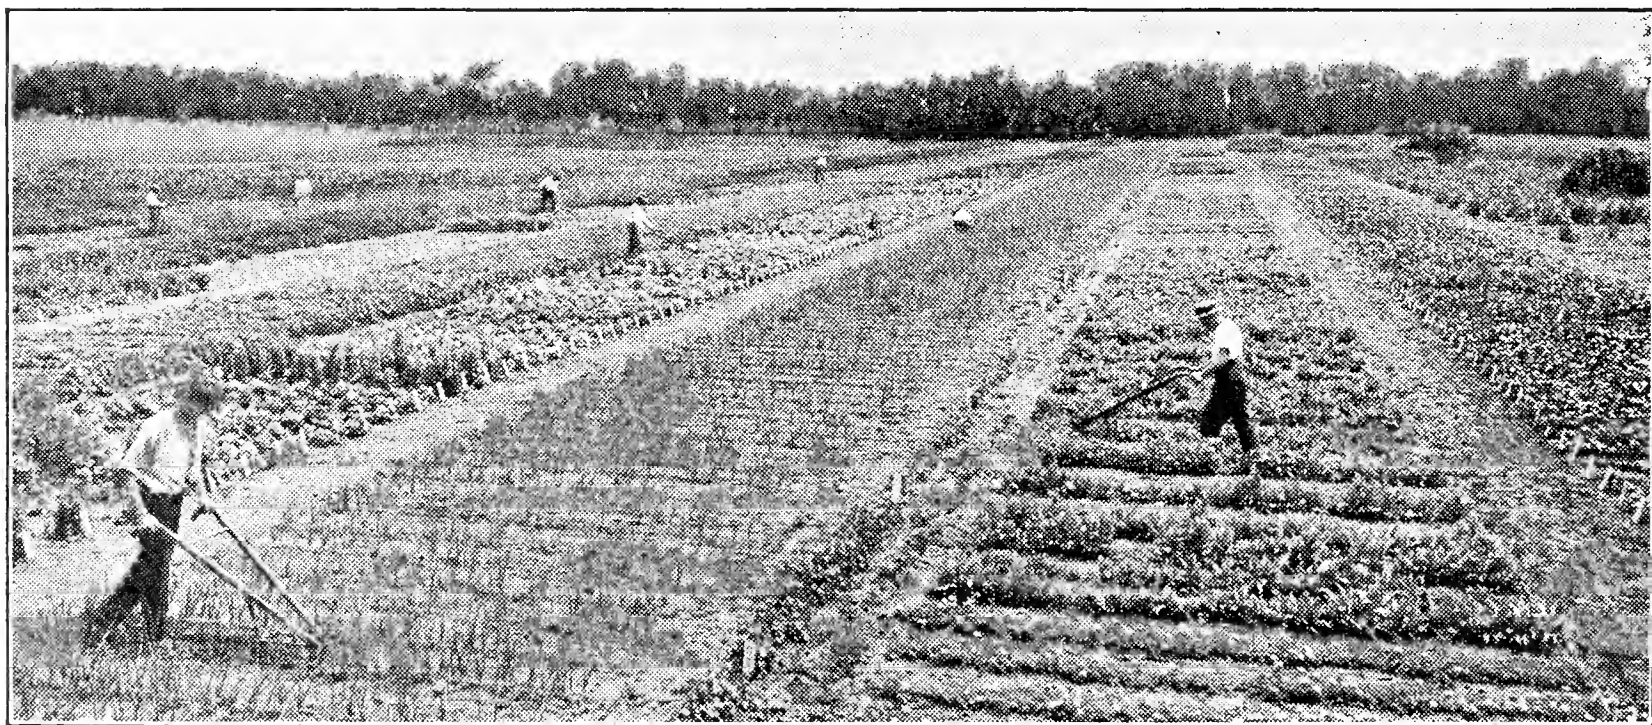

A glance at the above picture, which shows only a corner of our experimental grounds, will give you some idea of the vast amount of work that goes on each year at our Floradale Seed Farms. By hybridization and the selection of the best individual plants for stock seed, standard varieties are continually improved and new ones created.

Our staff of expert plant breeders, with keen eyes and a knowledge of just what makes one plant better than another, go through our growing fields, experimental grounds and test blocks day after day selecting those plants which show special merit. To prevent pollenization by bees carrying pollen from some less desirable plant, the selected plants are "caged," or, in other words, completely surrounded and covered with a muslin netting as shown in the picture above. Some of the "caged" plants are those which showed signs of a "break" or "mutation" and from which an entirely new or better variety may be developed.

The actual results of this careful work and the many breeding projects conducted both at Floradale and at Fordhook, are seen in the many new and improved varieties of flowers and vegetables which Burpee has introduced.

Burpee's Fordhook and Burpee's Floradale Farms are the most famous Seed Farms in the world.
